GULF TUNNELING

Gulf Tunneling (GT) is an engineering firm that specializes in planning and executing complex boring & tunneling works. Since inception in 2002, we have become a leader in the field of Micro-Tunneling in the State of Qatar.

Our acquired technological and operational experience—coupled with the rapid growth of the region—allows us to partake in great infrastructure projects and developments throughout the State of Qatar, with over 45,000 meters of tunnel currently installed or ongoing. Our underground installations have reached remarkable depths, on every type of ground condition, with pipe diameters reaching several meters.

We have served government agencies, gas majors, and private contractors/developers using our field-expertise and our fleet of equipment. Our services include installation of all kinds of underground gravity and pressure pipelines for drainage, water mains, and utility tunnels.

Gulf Tunneling is considered the biggest self-contained Micro-Tunneling company in the Gulf. Our technical & commercial team is multinational, comprised of professionals with project experience from around the world. HSE has always been a top priority: we have maintained a record of zero Loss-Time Incidents (LTI) in every project. At Gulf Tunneling, our objective is excellence.

CONTROL ROOM

Inductive measuring system allows for highly reliable steering operation.

HEALTH, SAFETY, ENVIRONMENT

We have maintained a record of zero Loss-Time Incidents (LTI) in every project.
